

About PC-BSD

Simplicity, Security, Speed - Your desktop is ready! PC-BSD is a complete desktop operating system, which has been designed with the "casual" computer user in mind. It offers the stability and security that only a BSD-based operating system can bring, while at the same time providing a comfortable user experience, allowing you to get the most out of your computing time. With PC-BSD you can spend less time working to fix viruses or spyware and instead have the computer work for you.

Installing the system is simply a matter of a few clicks and a few minutes for the installation process to finish. Hardware such as video, sound, network and other devices will be auto-detected and available at the first system startup. Home users will immediately feel comfortable with PC-BSD's desktop interface, with KDE 4.x running under the hood. Software installation has also been designed to be as painless as possible, simply double-click and software will be installed.

Features

- Fully functional desktop operating system, running FreeBSD 8.x® under the hood.
- Optional 3D desktop effects and acceleration

- Graphical system installer, makes the system installation process effortless.
